About Rebell

Rebell GmbH was founded in 1988 in Grünwald near Münich. The company quickly established itself successfully on the German and European market due to offering quality calculators for reasonable prices. Our goal is to offer the highest quality in accordance with German standards at the best possible price. This effort is reflected in all Rebell branded products.

An attempt to impose environmental standards in production was completed on the 25th anniversary of the company. All products of the Rebell brand, including packaging and instructions are now made from recycled materials.

Considerate approach to the environment and the use of recycled materials is not Rebell's highest goal. On the contrary. It is defined as the minimum requirement for production. The use of renewable raw materials such as bamboo, production of calculators without harmful batteries and replacing them with solar, water-based (100%) power supplies, the claims that are reflected in the Rebell product range. As a manufacturer of calculators Rebell goes further and integrates valid DIN and ISO standards in the development of products at home, in the office, or at school.

Rebell brand products are intended for personal and professional use of products and are complemented by the Fiamo brand that reflects the innovation and market trends and focuses on product development for science and education.

Products of Rebell and Fiamo brands are available in 27 European countries.

In 2008 The Rebell brand has been acquired by the MORAVIA Group, which is continuously building up and extending the product portfolio.

MORAVIA Europe is a member of the MORAVIA Group that has been operating on the market as an international distributor of calculators since 1997. It provides its partners with comprehensive service and support.

Pocket Line

Rebell **HC 108**

About the Product-Line

Pocket calculators are small, lightweight and general purpose handheld calculators for everyday use. No matter where you are if it is at home, outdoors, or somewhere on the road, Rebell pocket calculator should be kept always on hand. Soft rubber keys, 8-digit easy-to-read LCD display, standard arithmetic operations, square root, independent memory, it all makes it the ideal companion for your calculations. Auto power off feature prolongs battery life by turning the calculator automatically off after several minutes of inactivity. Depending on the model, some are equipped with solar panels and a plastic case for added protection from damage.

ECO Line – Solar-Powered

Rebell Eco 10

About the Product-Line

This Rebell ECO line comprising environmentally friendly calculators that are 100% solar-powered and contain NO batteries. The „Blue Angel"eco-labled calculators are made from 70% recycled plastics, thus saving the earth by reusing limited resources.

Benefits to health and environment

■ Use of renewable energies

■ High level of serviceability.

Using the sun to generate electric power
In day-to-day life we can use solar milk frothers to refine our coffee or have the time shown using a solar powered wall clock or a solar powered radio alarm clock. Tiny solar cells in the products generate electric power from the sunlight. By working without cadmium-containing batteries and other contaminants photovoltaic products that can help reduce the impact on the environment and promote the spread of solar cells.

ECO Line – Bamboo

About the Product-Line

The successful launch of the Rebell Eco series of pocket and desktop calculators, featuring no-battery 100% solar or water powered product, encouraged products that should use as much natural and renewable resources as possible. The bamboo is the selected natural choice as the next theme for green products. Bamboos are easily replanted, harvested and widely available.

Bamboo is one of the fastest-growing plants on Earth, growing as quickly as 120cm in a day. It can reach heights up to 20 meters. It takes about 3-4 month to grow, 5-6 years to reach maturity. They are easily replanted and requires little attention on fertilizers to do so. Thus making it a friendly plant to grow and harvest.

Bamboo's long life makes it a Chinese symbol of longevity, while in India it is a symbol of friendship. Popular in Asia as a strong and reliable material for centuries, it is used in construction, food, furniture, housing, paper, fuel, musical instruments, food, clothing and many other products.

From the drawing board, Rebell Eco series of calculators are pleased to introduce the newest addition to the Rebell Eco family – The Rebell Bamboo 320, handy calculator and the Rebell Bamboo 350 desktop calculator. The Rebell Bamboo calculator is made by using carefully selected natural Moso bamboo. It is assembled by hand to the strictest production and quality requirements. As these are natural materials products, the grains of each product may be different, creating the unique avant garde feel that is found only in the finest workmanship for luxury products.

FAQ

What is the source of the bamboo materials used?
They are harvested from nurseries.

If they are grown in bamboo nurseries, will it be possible to get a description of the procedure of grow of bamboo?
The bamboo plant regenerates quickly, reaching maturity within a short span of about 5 to 6 years. Bamboos are very resilient plants which has no issues with insects or diseases. Hence protracted re-forestation policies, care & maintenance are not necessary or required.

Does bamboo nurseries, which supply the bamboo materials, carry any international certification for sustainability farming?
To produce bamboo products, no deforestation is necessary. Bamboo plants grows rapidly and are harvested when it reaches maturity, about 5-6 years. International agencies like the Forest Stewardship Council (FSC) applies mainly to wood forest. Bamboo is classified as grass and certification is voluntary.

How is the round bamboo, transformed into the flat panels?
1. The bamboo poles are cut into strips with the green outer skin and nodes removed.
2. Bamboo strips are then boiled to remove sugars and starch, which attract termites. This process also acts as a natural non-toxic insects and pests repellent.
3. The bamboo strips are dried, to remove all moistures.
4. These dried bamboo strips are then stacked, glued and compressed into flat planks.

Those cute looking Panda Bears feed on bamboo. Are you taking food away from them?
The type of bamboo for making Rebell products, such as Rebell Bamboo 320 & Rebell Bamboo 350, is known as "MOSO". It is large and thick variety with origins in Hunan, Jiangxi, Zhejiang and Fujian of China.
Panda bear feeds on "Fargesia" type of bamboo plants. If you noticed from the ZOO and photos of Panda feeding, it is a small and slim type of bamboo plant. It's origin is from Sichuan, China. Hence, the Panda Bears are not affected in anyway.

Will bamboo farming for other uses, cause of any threat to the Panda Bears?
Panda Bear is a national treasure of China and endangered species. Any threats to the Panda Bears, it's habitat, food sources and any abuses are serious issue at the national level. It is taken very seriously with severe legal consequences under Chinese laws. Therefore NO Panda Bear is affected by the production process.

ECO Line – Water

Rebell Eco 610

Principle of Water Electric-power

The water electric-power capsule consists of 2 electrodes, Copper (Cu) and Zinc (Zn). When the 2 metals immerced in an electrolyte (Water), the chemical reaction can be converted into electric energy.

Copper (Cu+) ions and Zinc (Zn+) ions will be released simultaneously into the water causing the 2 metals negatively charged; however, the amount of Zn+ ions released is much larger that that of Cu+ ions. This results in an electro-potential difference between the Cu and Zn electrodes which can then function as an energy source generating electric-current.

Note: One fill of the capsules provides continuous power for around 2 weeks.

For optimum performance, add a small amount of salt into the water.

Professional & Business

About the Product-Line

These high-performance series are made for professionals. Compatible in any office environment, each Rebell professional calculator has an extensive range of useful functions. A slide switch provides handy decimal point selection and rounding. With its double memory, multiple totals can be easily stored and retrieved. Calculate profits and selling prices easily using simple Mark up function. Correction key allows you to backspace the current entry.

Large sure-feel buttons make digit entry reliable. Durable and robust large scaled housing. Easy to read angled LCD display with big digits and 3digit comma markers. . Two-way power allows for use in varied lighting conditions. To save energy further, the auto power off function switches the calculator off after several minutes of inactivity.

Simply ideal for business, office and home use.

Financial Line

Fiamo **ABA 10**

About the Product-Line

Advanced financial calculator for students and professionals in finance, accounting, real estate, banking, investment and statistics.

The ABA10 operates in standard calculator and worksheet modes. The standard mode lets you perform common math and trigonometric function as well as operations involving the time value of money – mortgages, savings, or annuities in which payments are equal and evenly spaced. The ABA 10 worksheet mode includes tables for TVM, amortization, cash flow, bonds, statistics, depreciation, percents, margin, mark-up, and compound interest. All worksheet values are stored in memory, so you don't have to retype all the bond maturity or cash flow analysis figures.

- 120 functions
- 10 memory registers + variables from worksheets
- Time-value-of-money calculations such as annuities, mortgages, leases and savings, generates amortization schedules
- Interest rate conversions
- Advanced cash-flow analysis for up to 24 uneven cash flows with up to 4-digit frequencies; computes NPV and IRR

- 6 depreciation methods, book value, and remaining depreciable amount: SL, SYD, DB, DBX, SLF, and DBF
- List-based 1- and 2-variable statistics with four regression options: linear, logarithmic, exponential and power
- Break-even calculations, interest conversions, Δ %, margin, markup, profit and loss
- Math functions include trigonometric calculations, natural logarithms, and powers

About the Product-Line

Fiamo Math Trainer

The Math Trainer is a unique educational tool designed specifically to aid children from 5 years and older in exploring basic maths. Math Trainer does not perform calculations, but generates a sequence of questions – over 10 000 preprogrammed questions in all. This ground breaking educational tool is developed with input from school teachers and involves children in maths practice through an enjoyable instant feedback. Fractions, decimal, brackets, percentages, ratios, maths operator, memory training and much more.

- More than 10,000 maths questions
- 15 training lessons
- 5 levels of difficulty for each lesson
- Gives trophies for correct answers
- Select between +, –, × and ÷
- Powered by 100% solar energy
- Large 2-line display
- Unique feature of the Teacher's Mode
